Funding Opportunities Weekly Digest–August 31, 2021

Check out the [Office of Sponsored Programs website](#) to view more [funding opportunities](#) to consider.

Federal

Conservation Outreach: Racial Equity and Justice Conservation

The goal of this outreach is for Natural Resources Conservation Service in collaboration with partners to expand the delivery of conservation assistance to historically underserved farmers and ranchers, including socially disadvantaged, limited resource, beginning, tribal, and veteran. Proposals should support activities that introduce the concepts of climate-smart agriculture and assist producers with planning and implementation of conservation practices and principles.

Application Deadline: 10/25/21 | [View Opportunity](#)

Please see [NIFA Upcoming RFA Calendar](#) and email aggrant@tennessee.edu to apply.

FY22 Neotropical Migratory Bird Conservation Act Grants

The US Neotropical Migratory Bird Conservation Act established an annual, competitive grants program to support projects that promote the conservation of neotropical migratory birds and their habitats in the US, Canada, Latin America, and the Caribbean. This program supports the Department of the Interior and Fish and Wildlife Service's mission of protecting and managing the nation's natural resources by collaborating with partners and stakeholders to conserve land and water and to expand outdoor recreation and access.

Application Deadline: 11/04/21 | [View Opportunity](#)

Graduate Research Fellowship Program

The purpose of this program is to help ensure the quality, vitality, and diversity of the scientific and engineering workforce of the US. The program recognizes and supports outstanding graduate students who are pursuing full-time research-based master's and doctoral degrees in science, technology, engineering, and mathematics or in STEM education.

Environmental Sustainability

The goal of this program is to promote sustainable engineered systems that support human well-being and that are also compatible with sustaining natural environmental systems. These systems provide ecological services vital for human survival. Research efforts supported by the program typically consider long time horizons and may incorporate contributions from the social sciences and ethics. The program supports engineering research that seeks to balance society's need to provide ecological protection and maintain stable economic conditions.

Small Grants for New Investigators to Promote Diversity in Health-Related Research

The purpose of this opportunity is to provide support for new investigators from diverse backgrounds, including from groups nationally underrepresented in biomedical, clinical, behavioral, and social sciences research and to conduct small research projects in the scientific mission areas of the National Institute of Diabetes and Digestive and Kidney Diseases or the National Human Genome Research Institute. This will support small research projects that can be carried out in a short period of time with limited resources and seeks to facilitate the transition to research independence.
