## **Local Food Promotion Program**

The purpose of the Local Food Promotion Program is to support the development, coordination, and expansion of local and regional food business enterprises to increase access to and availability of locally and regionally produced agricultural products.

Application Deadline: 5/11/20 | [View Opportunity](#) | [View RFA](#)

## **Regional Food Systems Partnerships**

Requests applications for the fiscal year 2020 Regional Food System Partnerships grant program. USDA Agricultural Marketing Services (USDA AMS) will competitively award grants to eligible applicants for projects that support partnerships to plan and develop local or regional food systems.

Application Deadline: 5/11/20 | [View Opportunity](#) | [View RFA](#)

### **Federal-State Marketing Improvement Program**

Provides matching funds on a competitive basis to assist eligible entities in exploring new market opportunities and to encourage research and innovation aimed at improving the efficiency and performance of the US agricultural marketing system. Proposals may focus on addressing barriers, overcoming challenges, or realizing opportunities manifesting at any stage of the marketing chain including direct, wholesale, and retail. Proposals must have a strong marketing focus, must involve research, and the primary beneficiaries must be agricultural producers and agribusinesses. Proposals that involve training or education programs must include a research component that tests the effects of the program on the marketing goals.

Application Deadline: 5/11/20 | [View Opportunity](#)

### **Farmers Market Promotion Program**

Purpose is to support the development, coordination, and expansion of direct-producer-to-consumer markets to increase access to and availability of locally and regionally produced agricultural products.

### Do Dog Breeds Differ in Pain Sensitivity?

This study will endeavor to answer whether dog breeds differ in pain sensitivity, and whether breed affects veterinarians' treatment of pain in dogs. If breed differences in pain sensitivity exist, future work would be performed to understand genetic associations, and advance our understanding of effectively treating pain in a breed-specific manner. If no differences exist, then the impact of the human perception of breed differences must be understood to ensure that dogs of every breed receive appropriate pain management.
