## Funding Opportunities Weekly Digest–March 30, 2022

---

**To notify the Office of Sponsored Programs (OSP) of your intent to apply for any of these or other grant opportunities, please submit a [Proposal Intake Questionnaire](#) to provide OSP with preliminary information.**

**Check out the [Office of Sponsored Programs website](#) to view more [funding opportunities](#) to consider.**

---

### Federal

#### **FY22 Bioenergy Technologies Office (BETO) Waste Feedstocks and Conversion Research and Development**

Supports priority areas addressing new strategies for energy and resource recovery from waste streams. Waste streams—including municipal solid waste, animal manure, wastewater residuals, and other organic wastes—have been identified as a key feedstock for the production of biofuels and bioproducts. Supports priority areas addressing development of more robust organisms and catalytic processes for the conversion of sustainable feedstocks and intermediates into biofuels and bioproducts.

## Urban Integrated Field Labs

This program seeks applications that will improve the science underpinning our understanding of climate and environmental predictability across complex and variable urban regions. Department of Energy (DOE) supports fundamental systems level research aimed at identifying the foundational principles of dynamic physical, biogeochemical, and human processes and interactions and advancing fundamental understanding of the predictability of the climate and broader earth system. DOE aims to develop the science, technology, and knowledge base that is necessary to inform actions to enable the resilience of natural-human systems that are exposed to climate trends, variabilities, and extremes.

Application Deadline: 6/16/22 | [View Opportunity](#)

---

## Women Overcoming the World's Climate Crisis with STEM

The goal of this program is to support STEM-informed solutions that mitigate or promote adaptation to the negative effects of climate change. To strengthen community groups working to adapt to or mitigate the effects of climate change, with emphasis on women- or girl-led organizations, and those working to advance women in STEM within their countries and across their region. To provide support to innovative climate change adaptation or mitigation solutions led by local women in STEM. To provide capacity building, innovation investments, and advocacy support for women innovators in the blue and green economies.

Application Deadline: 5/24/22 | [View Opportunity](#)

**Morris Animal**  
FOUNDATION

### **Study of Osteosarcoma in Giant-Breed Dogs**

Seeking funding to collaborative, interdisciplinary groups working on treatment approaches that have strong translational potential leading to clinical impact. Approaches may encompass methods of early diagnosis, if appropriate. Successful proposals will include novel approaches (not previously funded) and require establishing technical merit and feasibility. Academic/industry partnerships are welcome, provided there is both financial and in-kind input and recognition that Morris Animal Foundation contracts include royalty agreements.

Application Deadline: 6/13/22 | [View Opportunity](#)
