The goal of this funding opportunity is to produce solutions and/or strategies that minimize the adverse impacts of solar energy on wildlife and maximize the ecosystem benefits while enabling the rapid deployment of ground-mounted solar energy.

Application Deadline: 6/20/22 | [View Opportunity](#)

Salmonella Risk Assessment

The Food Safety and Inspection Service (FSIS) is the public health agency in the US Department of Agriculture responsible for ensuring the safety of meat, poultry, and egg products. FSIS is developing two separate risk assessment models, in chicken and in turkey. These production-to-consumption risk models will estimate reductions in foodborne illness attributed to chicken and to turkey resulting from control of Salmonella.

Application Deadline: 4/15/22 | [View Opportunity](#)

Food for Progress

Opportunity to implement field-based projects that aim to improve agricultural production and expand trade of agricultural products in developing countries.

Bureau of Land Management Eastern States Fisheries and Aquatic Resources Management

The Bureau of Land Management priorities are (1) to support inventory; (2) to maintain and conserve the chemical, physical, and biological integrity of aquatic resources; (3) to restore aquatic resources affected by past and present impacts, aquatic invasive species, wildfire, drought, and floods and increase their resistance and resilience to the impacts of climate change; (4) to sustain and identify the quantity and quality of water required to conserve and restore riparian and fisheries resources, and secure water rights and protections so sufficient water is physically and legally available for all public land management purposes; (5) and to collaborate to foster adaptive approaches to conservation and restoration and implement education and outreach programs. Learn more about opportunities available at the link below.

Lever for Change: Build A World Of Play Challenge

This opportunity provides a challenge to fund bold ideas that will help build a world where every child has the chance to play and learn. The challenge seeks solutions designed to meaningfully impact the well-being and holistic development of young children (birth-to-six) in a sustainable way. It asks the question: what if the needs of the world's youngest children, their families, and their communities were a driving force in everything from the way societies design care and education systems, plan health systems, design cities and
