Funding Opportunities Weekly Digest–November 16, 2022

To notify the Office of Sponsored Programs (OSP) of your intent to apply for any of these or other grant opportunities, please submit a [Proposal Intake Questionnaire](#) to provide OSP with preliminary information.

Check out the [Office of Sponsored Programs website](#) to view more [funding opportunities](#) to consider.

Federal

Early Career Research Program Department of Energy

This opportunity provides funding to support scientific discoveries and major scientific tools to transform our understanding of nature and advance the energy, economic, and national security of the US. The Office of Science supports the frontiers of science, the twenty-first century tools of science, and science for energy and environment, which paves the way to spur discoveries and innovations for advancing the department's mission in energy and

Development and Implementation of Healthy Meals Incentives School Food System Transformation Challenge Subgrants

Opportunity to stimulate innovation in strengthening the availability of and access to nutritious food products in the K-12 school food marketplace. These subgrants will support a more resilient food system through expanding manufacturing and purchasing capacity at the local and regional level. This, in turn, increases equitable access to healthy food products both in schools and in communities by way of support for agricultural producers, growers, and processors impacted by COVID-19. The subgrants will support collaborative projects between school districts, food producers, suppliers, distributors, and/or community partners to stimulate innovation in strengthening the availability of and access to nutritious food products in the K-12 school food marketplace.

Application Deadline: 2/1/23 | [View Opportunity](#)

United States Department of Agriculture
National Institute of Food and Agriculture

Food and Agriculture Service Learning Program

The purpose of this program is to increase the knowledge of agricultural science and improve the nutritional health of children. The program's goal is to increase the capacity for food, garden, and nutrition education within host organizations or entities, such as school cafeterias and classrooms, while fostering higher levels of community engagement between farms and school systems by bringing together stakeholders from distinct parts of the food system.

Research and Mentoring for Postbaccalaureates in Biological Sciences

This opportunity invites the submission of proposals to establish networks to support full-time research, mentoring, and training for recent college graduates who have had few or no research or training opportunities during college in research fields typically supported by the Directorate of Biological Sciences. A strategic focus of the National Science Foundation is to foster the growth of a globally-competitive and diverse research workforce.

Application Deadline: 2/16/23 | [View Opportunity](#)

Paleoclimate

The goals of the paleoclimate program are to provide a baseline for present climate variability and future climate trends and improve the understanding of the physical, chemical, and biological processes that influence climate variability and trends over the long-term.
