evolutionary and ecological processes acting at the level of populations, species, communities, and ecosystems. The division encourages research that elucidates fundamental principles that identify and explain the unity and diversity of life and its interactions with the environment over space and time.

Application Deadline: Accepted Anytime | [View Opportunity](#)

Partnerships for Innovation—Research Partnerships Track

The Partnerships for Innovation Program within the Division of Translational Impacts offers researchers from all disciplines of science and engineering who are funded by NSF the opportunity to perform translational research and technology development, catalyze partnerships, and accelerate the transition of discoveries from the laboratory to the marketplace for societal benefit.

Application Deadline: 5/2/23 | [View Opportunity](#)

Division of Molecular and Cellular Biosciences Core Programs (MCB)

Supports research that promises to uncover the fundamental properties of living systems across atomic, molecular, subcellular, and cellular scales. The division also encourages research that exploits experimental and theoretical approaches and utilizes a diverse spectrum of model and non-model animals, plants, and microbes across the tree of life.

Application Deadline: Accepted Anytime | [View Opportunity](#)

Smith Center Accepting Award Nominations for 2023

The Smith Center for International Sustainable Agriculture was established with the vision of positioning the University of Tennessee Institute of Agriculture as an organizational leader for global engagement in the agricultural-related sciences among US land-grant institutions. We do this work by empowering UT faculty, staff, and students to be global change agents, who partner with others to develop and deploy sustainable solutions to the world's complex, agriculture-related challenges. The Smith Center will present six awards across two award categories (faculty/staff and students) in 2023. Please consider nominating a deserving colleague or student for one of the following:

UTIA Faculty and Staff Global Engagement Awards

- Faculty Lifetime Achievement Award
- Faculty Global Excellence Award
- Outstanding Staff Global Engagement Award

Nominations are due by **April 21, 2023**. Questions should be directed to Carrera Romanini at carrera@tennessee.edu or 865-974-7340.

Foundations and Nonprofits

Preventive & Early Intervention Canine Medicine and Health

The mission is to advance the health of all dogs and their owners by funding sound scientific research and supporting the dissemination of health information to prevent, treat, and cure canine disease. Canine Health Foundation supports a One Health model as a critical tool to achieving this

Application Deadline: 3/23/23 | [View Opportunity](#)

New Innovator in Food and Agriculture Research Award

The New Innovator in Food and Agriculture Research Award provides early-career scientists the investment needed to propel them into successful research careers.

Nominations Due: 2/22/23 | Application Deadline: 5/3/22 | [View Opportunity](#)

Regenerative Agriculture for Climate Resilient Farms and Value Chains

Funding opportunity for research to accelerate the adoption of Climate-Smart Agriculture and improve climate resiliency of farms and food value chains for commodity crops in North America, Australia, Europe, or South Africa.

Application Deadline: 5/17/23 | [View Opportunity](#)

Study of Canine Hemangiosarcoma

Accepting proposals for studies focused on preventing, detecting, and treating canine hemangiosarcoma. Hemangiosarcoma is the most frequently observed cancer diagnosis in the Golden Retriever Lifetime Study cohort and represents about 70 percent of all primary endpoint cancer deaths.

Application Deadline: 4/5/23 | [View Opportunity](#)

Study of Canine Inflammatory Bowel Disease

Accepting proposals for studies focused on canine idiopathic inflammatory bowel disease, a complex disorder arising from a combination of factors including genetic predisposition, microbiome changes, and altered immune response.
