Federal

**Bureau of Land Management Headquarters Threatened and Endangered Species Program**

The Bureau of Land Management Headquarters Threatened and Endangered Species Program works to conserve and recover federally listed and Bureau sensitive animal and plant species and their habitat on public lands. The Headquarters program is looking for projects that will result in or facilitate national implementation or outreach of tangible on the ground actions that will improve species populations or reduce population level threats.

Application Deadline: 3/24/23 | [View Opportunity](https://mailchi.mp/tennessee/osp-newsletter-2-1-2023?e=726ad51c0f)
The State Physical Activity and Nutrition Program
This program works at the state level to implement evidence-based nutrition and physical activity strategies and collaboratively leverage state investments, partnerships, and resources from various sectors (e.g., agriculture, transportation, education, healthcare, parks/recreation, business, housing, and defense/military) that address health disparities related to poor nutrition, physical inactivity, and/or obesity.
Application Deadline: 3/28/23 | View Opportunity

Human Nutrition
The Human Nutrition Task Force of the National Pork Board is currently soliciting research proposals in human nutrition. This proposal uses an initial letter of intent for initial screening.
Application Deadline: 3/1/23 | View Opportunity

Veterinary Services Grant Program
The Veterinary Services Grant Program is designed to support education and extension activities and practice enhancement initiatives that will enable veterinarians, veterinary students, veterinary technicians, and veterinary technician students to gain specialized skills and provide practices with additional resources needed to more effectively mitigate veterinary service shortages in the US. This program will bolster the capacity of private practitioners to provide food animal veterinary services in designated rural veterinarian shortage situations.
Application Deadline: 3/29/23 | View Opportunity
Beginning Farmer and Rancher Development Program

Supports programs and services that address the needs of beginning farmers or ranchers with limited resources; socially disadvantaged beginning farmers or ranchers; and farm workers desiring to become farmers or ranchers.

Application Deadline: 4/27/23 | View Opportunity

Application Deadlines:

- **February 13:** Crop Protection and Pest Management
- **February 13:** Methyl Bromide Transition Program
- **February 16:** Food Safety Outreach Program
- **March 28:** Small Business Innovation Research and Small Business Technology Transfer Programs Phase II
- **March 30:** Agriculture and Food Research Initiative - Education and Workforce Development Food and Agricultural Nonformal Education Program

Division of Environmental Biology (DEB) Core Programs

The Division of Environmental Biology Core supports research and training on evolutionary and ecological processes acting at the level of populations, species, communities, and ecosystems. The division encourages research that elucidates fundamental principles that identify and explain the unity and diversity of life and its interactions with the environment over space and time.

Application Deadline: Accepted Anytime | View Opportunity

Division of Molecular and Cellular Biosciences Core Programs (MCB)

Supports research that promises to uncover the fundamental properties of living systems across atomic, molecular, subcellular, and cellular scales. The division also encourages research that exploits experimental and theoretical approaches and utilizes a diverse spectrum of model and non-model animals,
Cooperative Agreement to Support the Food and Agriculture Organization
Opportunity to support global strategies that address food safety and public health.
Application Deadline: 3/7/23 | View Opportunity

Smith Center Accepting Award Nominations for 2023

The Smith Center for International Sustainable Agriculture was established with the vision of positioning the University of Tennessee Institute of Agriculture as an organizational leader for global engagement in the agricultural-related sciences among US land-grant institutions. We do this work by empowering UT faculty, staff, and students to be global change agents, who partner with others to develop and deploy sustainable solutions to the world's complex, agriculture-related challenges. The Smith Center will present six awards across two award categories (faculty/staff and students) in 2023. Please consider nominating a deserving colleague or student for one of the following:

UTIA Faculty and Staff Global Engagement Awards

- Faculty Lifetime Achievement Award
Nominations are due by **April 21, 2023**. Questions should be directed to Carrera Romanini at carrera@tennessee.edu or 865-974-7340.

**Foundations and Nonprofits**

### 2023 Seeding Solutions Request for Applications
Supports innovative projects that address challenges in food supply and agroecosystem management through novel partnerships. Such collaborations provide opportunities to engage stakeholders as integral members of the research team and increase the likelihood of a project’s application beyond its scope.

Application Deadline: 6/28/22 | [View Opportunity](#)

### Regenerative Agriculture for Climate Resilient Farms and Value Chains
Funding opportunity for research to accelerate the adoption of Climate-Smart Agriculture and improve climate resiliency of farms and food value chains for commodity crops in North America, Australia, Europe, or South Africa.

Application Deadline: 5/17/23 | [View Opportunity](#)

### Study of Canine Hemangiosarcoma
Accepting proposals for studies focused on preventing, detecting, and treating canine hemangiosarcoma. Hemangiosarcoma is the most frequently observed cancer diagnosis in the Golden Retriever Lifetime Study cohort and represents about 70 percent of all primary endpoint cancer deaths.

Application Deadline: 4/5/23 | [View Opportunity](#)

### Study of Canine Inflammatory Bowel Disease
Accepting proposals for studies focused on canine idiopathic inflammatory bowel disease, a complex disorder arising from a combination of factors including genetic predisposition, microbiome changes, and altered immune response.

Application Deadline: 4/14/23 | View Opportunity
