help strengthen the US economy; minimize the risk and spread of COVID-19; and reduce impacts to the environment and climate.

Application Deadline: 4/17/23 | [View Opportunity](#)

Plant Conservation and Restoration Management Program

The Plant Conservation and Restoration Program continues to advance the Department of the Interior's priorities to address the climate crisis, restore balance on public lands and waters, advance environmental justice, and invest in a clean energy future. Bureau of Land Management is focusing work in areas to facilitate meeting the priorities of the administration, secretary, congressional appropriations, and the bureau in implementing the National Seed Strategy.

Application Deadline: 4/17/23 | [View Opportunity](#)

Reducing Agricultural Carbon Intensity and Protecting Algal Crops

The Bioenergy Technologies Office's Renewable Carbon Resources program develops science-based strategies and technologies to cost-effectively transform renewable carbon resources such as agricultural waste and algae into high-quality, environmentally sustainable, conversion-ready feedstocks for biofuels and bioproducts. This funding opportunity announcement supports the program's strategies for the development of conversion-ready feedstocks for biofuels and bioproducts and supports the Biden administration's goal to produce sustainable aviation fuels.

Application Deadline: 5/16/23 | [View Opportunity](#)

Special Supplemental Nutrition Program for Women, Infants, and Children National Workforce Strategy Development

The Women, Infants, and Children Workforce Development multi-year initiative will increase cultural representation of the workforce, program participation

funding. The National Strategy provides a roadmap of actions the federal government will take to end hunger and reduce diet-related diseases by 2030—all while reducing disparities.

Application Deadline: 4/17/23 | [View Opportunity](#)

Agriculture and Food Research Initiative—Sustainable Agricultural Systems

National Institute of Food and Agriculture seeks creative and visionary applications that take a systems approach for projects that are expected to significantly improve the supply of affordable, safe, nutritious, and accessible agricultural products, while fostering economic development and rural prosperity in America. Outcomes of the work being proposed should result in societal benefits, including promotion of rural prosperity and enhancement of quality of life for all those involved in food and agricultural value chains from production to utilization and consumption.

Application Deadline: 4/13/23 | [View Opportunity](#)

Organic Agriculture Research and Extension Initiative

The Organic Agriculture Research and Extension Initiative seeks to solve critical organic agriculture issues, priorities, or problems through the integration of research, education, and extension activities. The purpose of this program is to fund projects that will enhance the ability of producers and processors who have already adopted organic standards to grow and market high quality organic agricultural products.

Application Deadline: 4/13/23 | [View Opportunity](#)

Application Deadlines:

- **March 21:** [Children, Youth, and Families at Risk \(CYFAR\) Sustainable Community Projects](#)
- **March 28:** [Small Business Innovation Research and Small Business Technology Transfer Programs Phase II](#)
- **March 28:** [Alaska Native-Serving and Native Hawaiian-Serving Institutions Education Competitive Grants Program](#)
- **March 29:** [Veterinary Services Grant Program](#)
- **March 30:** [Agriculture and Food Research Initiative—Education and Workforce Development: Food and Agricultural Nonformal Education Program](#)
- **March 31:** [Hispanic-Serving Institutions Education Grants Program](#)

Plant Genome Research Program

The Plant Genome Research Program supports genome-scale research that addresses challenging questions of biological, societal, and economic importance. This program encourages the development of innovative tools, technologies, and resources that empower a broad plant research community to answer scientific questions on a genome-wide scale.

Application Deadline: Accepted Anytime | [View Opportunity](#)

Division of Environmental Biology Core Programs

The Division of Environmental Biology Core supports research and training on evolutionary and ecological processes acting at the level of populations, species, communities, and ecosystems. The division encourages research that elucidates fundamental principles that identify and explain the unity and diversity of life and its interactions with the environment over space and time.
